

Gripple Universal Clamp

Gripple's new Universal Clamp is an innovative addition to their wire support range. One size can replace over 11 different pipe clamp sizes within the range of 3/8" to 2 1/2" (15mm-65mm) making clamp ordering much easier, secure in the knowledge that the clamp will be the right size for the job. Always having the right size clamp will minimise time lost due to not having the correct size, it's easier to transfer another job, reducing waste and stocking one size reduces storage space. Fitted with a M8/M10 dual connector and removable insulated pads, these clamps are particularly suited to hanging all types of pipework within the mechanical installation and plumbing industries.

Installation is very easy and up to 6 times quicker than using traditional methods, thread the wire through the clamp, pull tight and lock with the self click closure. The simple installation and fact no tools are required makes it an attractive product for installation at a height. Adjustments are simple to make later using a key to unlock the fixing.

If you would like any more information, please contact our Customer Service department or your Sales Representative. You can see videos of the Universal Clamp being installed on the [Gripple website](#).

Key Product Features:

- Dual connection M8/M10
- 6 time faster than traditional methods
- Single piece cast construction
- No tools required for installation
- Universal-pipe sizes 3/8" to 2 1/2"
- Self click closure for easy and fast fixing
