

## Cutting Service

Our cutting service has never been as popular, with an ever increasing number of customer's realising the benefits and cost savings in ordering channel, studding and even cable tray pre cut to the desired length.

Rather than expensive site labour cutting dozens of lengths in less than ideal conditions, for a small charge we can cut your lengths to your precise dimensions in our dedicated workshop and deliver them for immediate installation. This can help reduce wastage as you only need to order the quantity you require.

Because everything is done in a workshop the quality of the cut, finish and accuracy of the dimensions will tend to be higher than is achievable on site. Site equipment that would otherwise be dedicated to the cutting of lengths will be available for other uses or not even required, again reducing cost.

Health and Safety risks can be improved by removing or reducing the amount of cutting done on site.

So if you have a requirement for a number of lengths of bespoke size, please give our Customer Service's a call to get a quote.

### Key Features:

- Channel, Studding & Cable Tray available
- Release site resources
- Improve quality & accuracy of cuts
- Reduce wastage
- Speed up installation times
- Reduce H & S risks
